

A photograph of a construction site. In the foreground, two workers are visible. One worker is standing, wearing a white hard hat, safety glasses, a blue long-sleeved shirt, and a high-visibility yellow and green safety vest. The other worker is kneeling, wearing a blue hard hat, safety glasses, a blue long-sleeved shirt, and a high-visibility yellow and green safety vest. They are both looking towards the camera. The background shows a large-scale construction project with various structures, including a large blue-roofed building under construction, and a dirt area with some equipment and materials. The overall scene is brightly lit, suggesting a sunny day.

GRD records a net profit after tax of \$13.1 million from ongoing operations.

Core engineering business, GRD Minproc, has 13 secured major studies with a projected capital cost of \$4.29 billion.

GRD sells Global Renewables' Eastern Creek UR-3R™ Facility in Sydney.

2008 high
