AMEC Minproc

Two companies have combined their strengths for a great future

AMEC + Minproc have joined forces to improve delivery for our customers by offering...

Combined expertise + wider global coverage + increased size

“ Our vision is to be recognised for a unique combination of excellent project delivery, industry leading mining and process technical expertise, and full project life-cycle capability. We will be industry leaders in a broad range of commodities from base and precious metals, to diamonds, iron ore, coal and fertilizers. By leveraging our combined capabilities we will be the global mining service provider and employer of choice. ”

AMEC Minproc

Why AMEC + Minproc is a winning combination

Bringing the two companies together delivers a global mining business which will seamlessly and consistently deliver projects for our customers to the highest standards.

We both have:

- operations across the world - which fit well together to provide almost total global coverage.
- complementary sets of expertise. Minproc is internationally recognised for expertise in process engineering, particularly in copper, gold, uranium, nickel and iron ore. AMEC is recognised for mining consulting services, engineering studies and project delivery. The two sets of expertise fit together well.
- a strong safety and risk management culture.
- a 'people' focus.

And by bringing together AMEC's significant oil and gas capabilities with this expanded mining business, there are further exciting opportunities to share best practice, people and expertise.

Combined expertise + wider global coverage + increased size = improved delivery for our customers

What is AMEC?

AMEC is a leading supplier of high-value consultancy, engineering and project management services to the world's energy, power and process industries. AMEC designs, delivers and maintains strategic and complex assets for its customers. AMEC's businesses employ over 21,000 people in more than 30 countries globally.

AMEC's Mining & Metals business has developed some of the most challenging projects in the world. Our more than 2,000 employees are currently providing EPCM services for more than C\$7 billion of mining and mineral processing projects in North and South America.
